EXPERIENCE

GIS Lead Technician II

UDC / Walnut Creek CA / Current - June 2019

Working closely with onsite clients to evaluate, find, and QC for the Accurate Reconciliation of Meter Services project at PG&E

- Created & updated specification documents.
- Trained new employees & acted as a substitute lead.
- Utilize FME, ArcFM, GDGIS Web-viewer, GSR's, As-built, & drawing tools.

GIS Field Technician

UDC/ Vacaville CA / December 2018 - June 2018

Collected data in the field using a hand-held computer while drawing and editing electric services with field collection error rates below 3%.

- Tested field software for data collection.
- Recorded, edited, and drew electric services.
- Utilized ArcPad & laser measuring devices.

Environmental Technician

Trident Environmental / Antioch CA / May 2018 - July 2016

Collected field data for various projects including testing for lead underneath transmission towers & measuring/checking for leaks at active gas well sites.

- Lead based soil sampling using XRF equipment.
- Precise measurements of gas well heads.
- Coordination with facilities managers.
